Inspiring students to become their best: The Legacy of George Washington Carver

This year, Iowa State University celebrates the legacy of its first African-American student and faculty member, George Washington Carver. Renowned for developing innovative uses for a variety of agricultural crops such as peanuts, soybeans and sweet potatoes, Carver's legacy at Iowa State is even more than academic achievement. He was an accomplished musician, artist, orator, athletic trainer and student leader. Iowa State's land-grant heritage provided a rich environment where he could take root and blossom. It's an environment that remains rich in academic, cultural, artistic and athletic opportunities. One where students can strive to become their best.

Iowa State University of Science and Technology is an Iowa State Board of Regents institution.

Student Billing

Residence Hall and USAC residents are billed by the Accounts Receivable Office for long distance calls. (One resident in each USAC apartment is billed for basic service.) Telecommunications call detail statements are mailed each month.

Charges must be paid monthly to avoid losing service and incurring a reconnection charge (non-refundable) of $10.

You are responsible for all calls placed using your authorization code. Do not give this information to anyone!

NOTE: FRAUDULENT BILLING CAN LEAD TO PROSECUTION - It is illegal for a person to charge long distance calls to another person's calling card or authorization code without their permission. Persons placing such calls to avoid payment for service are subject to prosecution and if convicted are subject to imprisonment and/or fine.

Data Network Information

The Iowa State University Data Network provides connectivity between computers, terminals, and local area networks throughout campus. This gives users the ability to access any machine on the data network with the appropriate software.

Point-to-Point (PPP)

Enhanced remote networking is available through PPP service utilizing 33.6K inbound modems and V.90 (56K) inbound modems. This gives users the ability to run applications such as Telnet, FTP, and WWW browsers. Use of PPP service is billed to a personal account through the Accounts Receivable Office. A Project Vincent account is required. Instructions for obtaining a Project Vincent account are available in 195 Durham Center.

To request PPP service, log in to Project Vincent:

TYPE request
SELECT PPP access

Answer the questions at each prompt.

Connecting to the PPP Server:

The supported software packages from the Computation Center are preconfigured to set up the connection. Information is available in the Solution Center, 195 Durham. With other software packages, for 33.6K dial 268-4PPP (268-4777). For V.90 (56K) dial 268-4565.

Connecting to Campus Inbound Modems

The inbound modems are connected to a terminal server that provides direct access to the Ethernet network. The modems support speeds up to 28.8 kpbs and MNP5 and LAPM data compression. To access these modems, dial:

268-enet
(268-3638)

After your modem's "connected" message appears, enter your Project Vincent username and password. A menu will then be presented.

Connecting to Campus Outbound Modems

Using the outbound modem pools, callers may connect to off campus systems reachable by modem. Both modem pools are Hayes-compatible and support up to 28.8 kbps connections, with speed setting controlled automatically. Additional features such as auto-reliable mode and data compression are activated automatically if the answering modem supports them.

To use the outbound modems:

From Ethernet:

Telnet to modem.iastate.edu. When the connection has been established, you are connected to an outbound modem.

TYPE ATZ
PRESS <RETURN> to reset the modem to its default settings. When "OK" appears on the screen, you are ready to call out from the network.

To place on-campus calls:

TYPE ATDT 4XXXX
PRESS <RETURN>

To place off-campus local calls:

TYPE ATDT+ 8 + seven-digit number
PRESS <RETURN>

NOTE

When placing long distance calls using the outbound modems, you must use an authorization code or calling card. You will be charged regular long distance toll rates.

To place long distance calls:

TYPE ATDT
8 + 1 + area code + seven-digit number
W
authorization code or calling card
PRESS <RETURN>

The "W" tells the modem to wait for the dial tone before dialing your authorization code.

When the modem connects to the remote system, "CONNECT" (speed) (mode) is displayed, where (speed) indicates the baud rate, and (mode) indicates special features such as RELIABLE or COMPRESSED.

Press <RETURN> a few times to get a login prompt; then log in as usual. When you finish, follow appropriate logout procedures; then hang up from the modem by entering the disconnect sequence (<BREAK><BREAK>).

For more information or assistance contact:
Solution Center
195 Durham Center
296-6000

Connecting to Ethernet in the Residence Halls

To use Ethernet, you will need three basic components:

- Ethernet Connection (installed by Telecommunications)
- Ethernet Card (unless your computer has a built-in Ethernet connector) Ethernet cards are available in the Solution Center, or through computer dealers. The Telecommunications Office supports 10BaseT connections in the residence halls.
- Communications Software Once your computer hardware is set up for Ethernet, you will need to install and configure network connectivity software. A suite of software, available through the Solution Center includes Netscape, Eudora, EWAN, and WSFTP.

Add, move, or disconnect
Student Ethernet

Temporary Data Protection

When using your telephone with a modem for data calls, activate Temporary Data Protection to prevent any interruption for the duration of your data call.

To activate:

LISTEN	for dial tone
PRESS	113

NOTE: Lightning may damage equipment connected to a power source or a communications jack. The Telecommunications Office is not liable for damage caused by electrical storms. Surge protectors will not guarantee protection. We recommend that you disconnect both the power cord and communications cable during electrical storms.

You'll be flying in a jet maintained by Tommy.

When Tommy grows up, he'll be an aircraft mechanic. Perhaps he'll work on a jet that you fly in some day.

By then, the job will require an advanced knowledge of chemistry, physics, and trigonometry. Unfortunately, very few kids are being prepared to master such sophisticated subjects.

If we want children who can handle tomorrow's good jobs, more kids need to take more challenging academic courses.

To find out how you can help the effort to raise standards in America's schools, please call 1-800-96-PROMISE.
If we all pitch in and help, America will get where it needs to go.

You'll be flying in a jet maintained by Tommy.

When Tommy grows up, he'll be an aircraft mechanic. Perhaps he'll work on a jet that you fly in some day.

By then, the job will require an advanced knowledge of chemistry, physics, and trigonometry. Unfortunately, very few kids are being prepared to master such sophisticated subjects.

If we want children who can handle tomorrow's good jobs, more kids need to take more challenging academic courses. To find out how you can help the effort to raise standards in America's schools, please call 1-800-96-PROMISE. If we all pitch in and help, America will get where it needs to go.

In America, you are not required to offer food to the hungry. Or shelter to the homeless. In fact, one of the nicest things about living here in America is that you really don't have to do anything for anybody.

To the 80 million of you who volunteered time and money last year, thanks for all you've given. Imagine what more could do.
